

Konia Token Whitepaper

Introduction

Konia (\$KON) is a decentralized meme-powered token that blends community-driven innovation with gamified utility. It offers fair launch access, game rewards, and a growing DeFi roadmap for holders and investors.

Mission & Vision

Our mission is to create a fun, accessible Web3 token powered by and for the community. Konia aims to become a scalable meme-token economy where entertainment, rewards, and governance intersect.

Tokenomics

Team / Development tokens will be vested over 24 months (2 years) to ensure project stability and long-term commitment.

Presale 30%

Liquidity + CEX 25%

Team / Development 15%

Staking / Rewards / Game 20%

Marketing / Influencer 10%

Total Supply: 100,000,000,000 KON

Token Type: ERC-20 (Ethereum)

Utility

KON powers the Konia Tycoon game, supports future staking mechanisms, community rewards, and exclusive NFT utilities. Subscribers unlock auto-mining boosts and in-game benefits.

Smart Contracts

Konia Token Whitepaper

Built on Ethereum, KON will use multiple smart contracts for token distribution, staking, subscriptions, and claims. Contracts are transparent and verifiable.

Roadmap Highlights

Phase 1: Website, community,

Phase 2: Presale, DEX listing, game launch

Phase 3: Mobile game, NFTs, CEX listing

Phase 4: DAO, staking, cross-platform growth

Governance

A DAO system will empower KON holders to vote on major decisions such as development priorities, token burns, or ecosystem grants.
