

# Konia Token - ETH Allocation Plan

## Konia Token Whitepaper

### Introduction

Konia (\$KON) is a decentralized meme-powered token that blends community-driven innovation with gamified utility.

It offers fair launch access, game rewards, and a growing DeFi roadmap for holders and investors.

### Mission & Vision

Our mission is to create a fun, accessible Web3 token powered by and for the community.

Konia aims to become a scalable meme-token economy where entertainment, rewards, and governance intersect.

### Tokenomics

Team / Development tokens will be vested over 24 months (2 years) to ensure project stability and long-term commitment.

Presale 30%

Liquidity + CEX 25%

Team / Development 15%

Staking / Rewards / Game 20%

Marketing / Influencer 10%

Total Supply: 100,000,000,000 KON

Token Type: ERC-20 (Ethereum)

# Konia Token - ETH Allocation Plan

## Utility

KON powers the Konia Tycoon game, supports future staking mechanisms, community rewards, and exclusive NFT utilities.

Subscribers unlock auto-mining boosts and in-game benefits.

## Smart Contracts

Built on Ethereum, KON will use multiple smart contracts for token distribution, staking, subscriptions, and claims.

Contracts are transparent and verifiable.

## Roadmap Highlights

Phase 1: Website, community, airdrop

Phase 2: Presale, DEX listing, game launch

Phase 3: Mobile game, NFTs, CEX listing

Phase 4: DAO, staking, cross-platform growth

## Governance

A DAO system will empower KON holders to vote on major decisions such as development priorities, token burns, or ecosystem grants.

## Tiered Presale Structure

## Konia Token - ETH Allocation Plan

Konia uses a transparent, tiered presale model to reward early participants while maintaining long-term value for the token.

Total Presale Allocation: 30% (30,000,000,000 KON)

Presale Goal: 75 ETH

ETH Price at Launch: ~\$2,490

Presale Stages: 3 rounds with decreasing KON per ETH

Tier	Rate (KON per ETH)	Tokens Allocated	ETH Raised	USD Raised
-----	-----	-----	-----	-----
Round 1	500,000,000 KON	10,000,000,000	20 ETH	~\$49,900
Round 2	400,000,000 KON	10,000,000,000	25 ETH	~\$62,375
Round 3	300,000,000 KON	10,000,000,000	30 ETH	~\$74,850
Total	-	30,000,000,000	75 ETH	~\$187,125

### Benefits of Tiered Presale

- Early investors get more tokens per ETH
- Creates urgency as price increases over time
- Ensures fair token distribution while capping supply at 30%

### ETH Allocation Plan

## Konia Token - ETH Allocation Plan

Following the sale of 30% of the total KON supply (30,000,000,000 KON) during the presale, Konia expects to raise approximately 75 ETH (~\$187,125 USD, based on ETH at \$2,495). These funds will be allocated to support token growth, game development, marketing, exchange listings, and long-term sustainability.

### Allocation Breakdown:

- Liquidity: 30% (22.5 ETH) - For Uniswap launch at 3x presale price (paired with ~3.13B KON), locked for 6-12 months.
- CEX Listing Fund: 20% (15 ETH) - To secure listings on exchanges like Coinstore or XT.com.
- Marketing: 20% (15 ETH) - Influencer campaigns, social media ads, and AMAs.
- Game Development: 15% (11.25 ETH) - For Konia Tycoon, Coin Catcher, and future game expansion.
- Team & Operations: 10% (7.5 ETH) - For salaries, management, and tools.
- Reserve Fund: 5% (3.75 ETH) - For audits, infrastructure, and emergency needs.

### Summary

Publishing this ETH allocation demonstrates Konia's transparency, builds investor trust, and supports long-term project success.
